

NIKHIL MOGILIGUNTA

Hyderabad, India | +91 8919402426 | mogiliguntanikhil2001@gmail.com

Professional Summary

Experienced in designing and developing enterprise-grade backend applications and microservices using Java, Spring Boot, Hibernate, and REST APIs. Strong background in banking and financial services, with expertise in payment processing workflows, API integrations, secure authentication and authorization, and distributed systems. Skilled in building scalable architectures, optimizing database performance, and implementing event-driven solutions using Kafka. Adept at delivering high-quality, reliable software solutions while embracing modern development practices, Agile methodologies, and continuous learning.

Technical Skills

Languages: Java, Core Python, C language, SQL, JavaScript (Basic)
Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA
Messaging: Kafka, Quartz Scheduler
Security: OAuth2, OIDC
Databases: MySQL, Oracle, PostgreSQL
Tools: Git, Maven, GitHub Actions, Postman, JIRA, Splunk, Postman

Professional Experience

Freelance Software Developer (Banking Domain) | Oct 2024 – Present

- Developed and maintained enterprise-grade backend applications for banking and financial services.
- Designed and implemented RESTful APIs using Spring Boot.
- Built microservices for payment processing and transaction management.
- Integrated Kafka for asynchronous event-driven communication.
- Implemented OAuth2/OIDC-based authentication and authorization.
- Optimized database operations using Hibernate and JPA.

Coding Tutor | 2022 – 2025

- Conducted programming classes for students and job seekers.
- Taught C language, Java, Python.
- Created coding exercises and interview preparation material.

Projects

Credit Card Autopay Platform (Banking Domain)

Technologies: Java 8, Spring Boot, Hibernate, JPA, Kafka, Quartz Scheduler, OAuth2, OIDC, MySQL, Splunk.

Project Overview:

Developed a large-scale banking application that automates recurring credit card payments by enabling customers to schedule, authorize, and manage automatic payments securely. The platform consisted of multiple microservices responsible for scheduling, authorization, payment execution, notifications, and retry management.

Responsibilities:

- Designed and developed RESTful APIs for payment scheduling and management using Spring Boot.
- Built microservices to handle payment initiation, processing, authorization, and execution workflows.
- Integrated Apache Kafka for asynchronous communication between payment processing services.
- Developed batch processing capabilities to process high volumes of scheduled payment transactions.
- Built notification services to send payment confirmations, failures, reminders, and status updates to customers.
- Worked closely with business analysts and QA teams to validate payment workflows and regulatory requirements.
- Participated in Agile ceremonies including sprint planning, backlog grooming, story estimation, and code reviews.
- Performed application monitoring and troubleshooting using Splunk logs and dashboards.

Education

Bachelor of Engineering (Computer Science) | 2018-2022

Sri Chandrasekharendra Saraswathi Viswa Maha Vidyalaya, Kanchipuram

- CGPA: 8.75/10

Intermediate (MPC) | 2016 - 2018

Narayana Junior College, Nellore

- Percentage: 84.7%
